PRESENTACIÓN

Conscientes de que la Resolución del Comex 049-2014, posteriormente modificada con resolución 03-2015 para vehículos livianos, así como las salvaguardias que impuso el gobierno a vehículos comerciales, iban a incidir en las condiciones del mercado, la Asociación de Empresas Automotrices del Ecuador (AEADE) decidió postergar para mayo de 2015 su décima quinta edición de la “Guía Nacional del Mercado de Vehículos Usados: Livianos y Pesados” que desde el 31 de marzo de 2008 se emite semestralmente.

La restricción a la importación de vehículos livianos no solo prorrogó hasta el 31 de diciembre de 2015 la vigencia de las Resoluciones del Comex números 65 y 66 de 2012 y 101 de 2013, sino que adicionalmente redujo en 42% los volúmenes de importación registrados por las empresas en el año 2013, aplicándose así una nueva restricción sobre montos ya restringidos, esta restricción comparada con el año base 2010 representa una disminución del 68% en la actividad de las empresas del sector para el año 2015.

Las sobretasa arancelaria para vehículos comerciales del 45%, vigente desde el mes de marzo del presente año, ejercerá un efecto negativo en el mercado de este tipo de vehículos, reduciendo las ventas de unidades nuevas a niveles mínimos con una disminución estimada de 80%, con relación al año 2014.

La drasticidad de la medida aplicada a vehículos de trabajo que se constituyen en el eje fundamental del transporte y logística de todas las actividades productivas de la economía nacional podría afectar indirectamente a varios sectores por un potencial encarecimiento del costo de los fletes y de transporte, así como también al sector metal-mecánico y carrocería nacional ya que los vehículos de comerciales en su mayoría son bienes intermedios que se complementan con la producción nacional de elementos de carga para su completa operatividad.

¿Cómo se calcula el Impuesto Verde?

Este impuesto en su cálculo considera dos variables: el cilindraje del vehículo (solo si es mayor a 1.500cc) y su antigüedad.

El Impuesto Verde se calcula con la siguiente fórmula:

$$\text{IMP VERDE} = (\text{Cilindraje del vehículo} - 1.500) \times \text{tarifa por cc según el cilindraje del vehículo (TABLA 1)} \times (1 + \text{factor de antigüedad})$$

(Tabla 2)

Ejemplo

¿Qué valor tendría que pagar por concepto del Impuesto Verde una Luv diesel 2.8L D/C 4x4 del año 2004?

Cilindraje = 2.800 cc

Antigüedad = (2011 - 2004) 7 años

$$\text{IMP VERDE} = (2.800 - 1.500) \times (0.11) \times (1 + 0.05) = 150,15 \text{ dólares}$$

TABLA 1 Cilindraje

No.	Tramo de cilindraje	Tarifa por cc. (A)
1.	menor a 1.500 cc.	0.00
2.	1.501 - 2.000 cc.	0.08
3.	2.001 - 2.500 cc.	0.09
4.	2.501 - 3.000 cc.	0.11
5.	3.001 - 3.500 cc.	0.12
6.	3.501 - 4000 cc.	0.24
7.	Más de 4.000 cc.	0.35

TABLA 2 Antigüedad

No.	Tramo de Antigüedad (años)	Factor (B)
1.	menor a 5 años	0%
2.	mayor de 5 a 10 años	5%
3.	mayor de 10 a 15 años	10%
4.	mayor de 15 a 20 años	15%
5.	mayor a 20 años	20%
6.	Híbridos	-20%

OBLIGACIÓN DE REPORTES A UNIDAD DE ANÁLISIS FINANCIERO

En Registro Oficial No. 542 del 26 de septiembre de 2011 se publicó la Resolución UAF-DG-2011-0052 de la Unidad de Análisis Financiero del Consejo Nacional Contra el Lavado de Activos que obliga a todos las empresas comercializadoras de vehículos (nuevos y usados) a elaborar y enviar mensualmente varios reportes que se detallan en la resolución.

Entre los reportes a enviar está el de las transacciones de US\$ 10.000 o más, con lo cual todas las ventas de vehículos deberán ser reportadas.

Previamente en el plazo de 60 días se deberá enviar una solicitud para la obtención de un Código de Registro para Reportes con los requisitos de la Resolución No. UIF-DG-2010-0090.

Adicionalmente se deberá asignar el desempeño del cargo de “Oficial de Cumplimiento” a un funcionario de la empresa quien deberá ser acreditado por la Unidad de Análisis Financiero previo el cumplimiento de varios requisitos en el plazo de 90 días.

En el pasado estaban sujetas a estas obligaciones únicamente las instituciones del sistema financiero, pero ahora se las ha ampliado a empresas de varios otros ámbitos por lo que es importante que todos los comercializadores cumplan con esta obligación, ya que de acuerdo al Art. 19 de la Ley de Prevención, Detección y Erradicación del Delito de Lavado de Activos, su incumplimiento será sancionado con multas de US\$ 500 a US\$ 20.000

Mayor información se podrá encontrar en la página web:
www.uif.gov.ec

¿CÓMO FUNCIONA LA GUÍA?

Conjuntamente con la incorporación de nuevos modelos, que semestre a semestre recoge la Guía Nacional del Mercado de Vehículos Usados: Livianos y Pesados, continuamos con el sistema racional de nomenclatura para la identificación de casi doce mil vehículos que ahora tiene nuestro informe y que se basa en el siguiente esquema para vehículos livianos.

1.- Marca del vehículo: fácilmente reconocible por el tamaño de letra y el sombreado, donde se ubica la fecha en que se recogió la información de los precios sugeridos de venta al público.

2.- Año de fabricación: ubicado en el costado izquierdo

3.- Identificación del vehículo: de acuerdo a los siguientes parámetros:

a) Modelo del vehículo según el fabricante

b) Cilindrada en litros (L) que puede transformarse en centímetros cúbicos a razón de 1L por 1000cm³

c) Tipo de combustible utilizado, siempre y cuando no sea gasolina, es decir diesel, descrito como DIE, en la mayoría de los casos, o según los sistemas de inyección diesel que prevalezcan como TDI (ejemplo AUDI, SKODA y VW), CRDi (Hyundai y Kia), CRD y TD (Mazda), DID (Mitsubishi), CRTi (Nissan), etc.

d) Tipo de vehículo:

- 2p (coupe),
- 2p+1 (coupe con 1 puerta en costado izquierdo y 2 en derecho)
- 3p (coupe con portezuela posterior),
- 4p (sedan),
- 5p (hatchback, 4 puertas laterales más portezuela posterior),
- SW (station wagon) camioneta cerrada derivada de un sedan
- SUV (todo terreno de 5 puertas) pudiendo ser 4x2 o 4x4
- SUV 3p (todo terreno de 3 puertas) pudiendo ser 4x2 o 4x4

- P/U (camioneta de balde) pudiendo ser C/S (cabina simple), C/S sin balde (cabina simple sin balde o cajón), S/C (Super Cab o cabina extendida de puertas encontradas), CM (cabina mediana de puertas encontradas) o D/C (doble cabina). En todos los casos en versiones 4x2 y 4x4

- van (mini furgoneta o furgoneta de pasajeros –px- o de carga)

e) Tipo de caja de cambios en los casos que no sea la convencional manual (T/M) o se preste a confusión y que por tanto use: Automática o Secuencial, S Tronic, Tiptronic, Multitronic, Steptronic, H Matic, Activematic y DSG.

f) Cualquier otra característica que resulte importante para la correcta identificación del vehículo y cuyas siglas constan en el cuadro de abreviaturas.

4.- Rango referencial: son los parámetros sugeridos para cada uno de los modelos de acuerdo al nivel de reventa en el mercado.

Siguiendo el mismo esquema anterior, continúa la nueva forma para reconocer más de tres mil vehículos pesados y semi-pesados que tiene esta décima quinta edición y que a no dudarlo, incidirá positivamente en su rápida identificación, por ello les invitamos a revisar su nomenclatura.

Todo modelo de vehículo pesado o semi pesado está descrito de la siguiente forma:

1.- Marca del vehículo: fácilmente reconocible por el tamaño de letra y el sombreado, donde se ubica la fecha en que se recogió la información de los PVP y su fuente.

2.- Año de fabricación: ubicado en el costado izquierdo

3.- Identificación del vehículo: de acuerdo a los siguientes parámetros:

a) Modelo o nombre del vehículo según el fabricante

b) Tipo de vehículo pesado: se reconocen con las abreviaturas de
- CA: camión (vehículo de un solo eje posterior con doble llanta) Sólo ciertos modelos de 2 toneladas de capacidad de carga, poseen un par de neumáticos en el eje posterior. Ejemplo: Chevrolet NHR, Daihatsu Delta, Kia K2700

- MU: mula (vehículo de doble eje posterior con doble llanta)

- TR: tracto (vehículo de arrastre con uno -4x2- o dos -6x4- ejes posteriores, con doble llanta y corta distancia entre ejes respecto al camión o a la mula)

- BT: Bus Tipo de servicio urbano con asientos fijos y capacidad hasta para 90 pasajeros, entre sentados y parados, fabricado en carrocería nacional (CN) o carrocería importada (CI). Su capacidad de carga máxima es de 7 toneladas

- BI: Bus interprovincial con asientos reclinables y capacidad hasta 45 pasajeros sentados, fabricado en carrocería nacional (CN) o carrocería importada (CI). Nótese que si bien pueden llevar hasta 7 toneladas, lo que significa 90 pasajeros, solo se permite 45 y sentados.

- TOR: Chasis torpedo, que se vende para la colocación de una carrocería de bus con capacidad máxima para 7 toneladas (45-90px)

- MB: Microbus con capacidad entre 25 a 32 pasajeros, puede ser escolar (asientos fijos) y de turismo (asientos reclinables) fabricado en carrocería nacional (CN) o carrocería importada (CI)

- FURGO: Furgoneta o minivan con capacidad para más de 9 y hasta 19 pasajeros sentados

- MIX: Mezcladora u hormigonera equipada

- RB: Recolector de basura importado

- VQ: Volqueta con diferentes capacidades: 6, 8, 10, 12 y hasta 14 metros cúbicos de capacidad de tolva.

c) Motor: dependiendo del espacio y disponibilidad, aparece información sobre el nombre de la máquina; su cilindrada en litros (L); el número de cilindros; y la potencia máxima del motor.

d) Algún otro dato que identifique al vehículo como chasis cabinado, chasis de volqueta, peso bruto vehicular, etc.

e) La capacidad efectiva de carga expresada en:

- toneladas (TN), para camiones, mulas y torpedos;

- toneladas de arrastre (TNA), para tractos;
- número de pasajeros (px) para buses o furgonetas;
- volumen de carga en las volquetas calculada en metros cúbicos (m³); y
- capacidad de mezcladoras y recolectores de basura expresadas en metros cúbicos y hasta yardas cúbicas.

Estas cinco clases de datos aparecen en cada modelo, exceptuando en ciertos vehículos que por su edad y dificultad de identificación, solo permiten expresar lo más importante.

4.- Rango referencial: son los parámetros sugeridos para cada uno de los modelos de acuerdo al nivel de reventa en el mercado.

SEIS PASOS HACIA EL AUTO CORRECTO

¿Cuál es el vehículo adecuado para mí? ¿Cómo puedo ahorrar dinero y hacer un buen negocio? Hemos creado esta sección para ayudarle a responder estas preguntas y guiarle a través de este proceso. Los siguientes pasos le ayudarán a tomar su decisión respecto del precio, tipo, estado y otros aspectos importantes del vehículo que está buscando:

1. ¿Qué tipo de vehículo necesita?

Si analiza sus necesidades, rápidamente descubrirá qué vehículo es el mejor para usted. Tómese un momento para pensar con qué fines usa su auto. ¿A cuántas personas necesita transportar? ¿Qué clase de manejo realiza con mayor frecuencia? ¿Cuán largo es su viaje al trabajo?, además de un consumo razonable de combustible.

En muchos casos, la gente escoge un vehículo por su llamativo modelo o porque está de moda. Si usted va en esta dirección, bien podría sobrepasar su presupuesto o sentirse inconforme al poco tiempo. Deje que sus necesidades, más no sus deseos, guíen su decisión.

Aquí están otras preguntas para tener en mente cuando empiece el proceso de comprar un auto:

- ¿Quiere transmisión manual o automática?
- ¿Necesita realmente un 4x4?
- ¿Qué características de seguridad desea?
- ¿Requiere una gran capacidad de carga? ¿Va a hacer trabajos de remolque?
- ¿El auto cabe en su garaje o área de parqueo?

2. ¿Cuánto puede pagar?

Establecer un valor real mensual que se acomode a su presupuesto es un primer paso crucial. ¿De cuánto debería ser éste?

Una regla importante es que el total de los pagos mensuales del auto, ya sea que posea uno o más de uno, no debería exceder del 20% de sus ingresos mensuales. Tómese el tiempo para hacer números ahora, antes de que vaya a comprar un auto. Esto no

solo le mostrará cuánto puede pagar, sino también le ayudará a controlar las cifras cuando esté negociando con el vendedor.

3. ¿Dentro del tipo de vehículo que necesita, ha considerado a todas las marcas?

La oferta de vehículos en nuestro país es bastante grande y con excelentes productos. Usted puede visitar páginas webs para estar al tanto de las características técnicas y especificaciones de los vehículos, antes de visitar los patios de autos o al vendedor.

4. ¿Ha considerado todos los costos sobre la propiedad?

Aquí hay un hecho que a menudo se puede pasar por alto: comprar un automotor podría ser barato, pero más caro tenerlo. ¿Por qué? Incluso si dos vehículos cuestan casi lo mismo, un auto puede depreciarse a un rango diferente, o puede tener un valor más alto para asegurarlo o mantenerlo. Antes de que usted compre un vehículo, debería estimar los costos a largo plazo de tener el automóvil que está considerando. Esto incluye depreciación, seguro, mantenimiento y rendimiento de combustible. Si usted considera estos datos para tomar una decisión inteligente, habrá ahorrado algunos dólares, que le podrán servir para la compra del siguiente.

5. ¿Cómo probar el automotor?

El objetivo de la prueba de manejo es experimentar, lo más cerca posible, el mismo tipo de condiciones de manejo en las que será usado el vehículo. Encienda y apague el auto varias veces, conduzca el vehículo a diferentes velocidades, deténgase y adéntrese en el tráfico o en la autopista. Si usted frecuentemente va hacia las montañas o maneja en la sierra, trate de encontrar algún terreno similar. Pase sobre huecos en la calle, realice varios giros y pruebe los frenos en un lugar seguro. Entre y salga del vehículo varias veces y asegúrese de sentarse en el asiento posterior, especialmente si planea llevar pasajeros. Mientras usted está evaluando el auto no se distraiga por el vendedor. No maneje con el radio encendido, eso puede evaluarlo después. Un automóvil es una gran inversión, asegúrese de que está empleando el tiempo suficiente para conocerlo. Entonces, considere una última cosa: su intuición. Si usted está indeciso con este vehículo, siga sus instintos. La

decisión de comprar un auto es muy importante y costosa como para emprenderla sin total confianza.

6. Alistándose para la compra

En este punto usted debe haber considerado todos los autos del tipo en el que está interesado. Debe tener una buena idea sobre lo que puede pagar y además haber probado sus opciones favoritas. Ahora es tiempo de reducir sus opciones a un vehículo y hacer el negocio.

AJUSTES DE PRECIO POR ESTADO, KILOMETRAJE Y REGIÓN

Independientemente del estado mecánico que presente el vehículo a valorar y que solo puede ser evaluado por un técnico de confianza del comprador, está la apariencia del automotor. Por apariencia se entiende el estado de la pintura, cuyo costo de reposición total está entre \$500 a \$1 000, dependiendo del tamaño del vehículo y el tipo de pintura. Por apariencia se comprende que todos los faros, molduras, lunas, cristales, retrovisores, logos, manillas, tapacubos, neumático de repuesto, ruedas, etc., se encuentren en buenas condiciones de acuerdo al año.

Las posibles colisiones que haya sufrido un automotor se comprueban cuando al examinar a ras de ojo las superficies metálicas, éstas muestran ondulaciones; cuando los marcos de las puertas evidencian haber sido pintados o se nota que hay fricción de partes metálicas; cuando las puertas tienen un sonido extraño al cerrar o abrir; cuando los cauchos que garantizan hermeticidad presentan roturas o desgaste excesivo; al comprobar que pernos o remaches están sin pintar o son diferentes entre si; al atestiguar sueldas sin un buen acabado y cuando los espacios entre superficies móviles como capot de motor, baúl y puertas no guardan la misma distancia en todo su contorno.

La apariencia también debe ser verificada en el interior a través del estado de la tapicería, el grado de deterioro de la alfombra y área de carga, las roturas que pudiera presentar el panel de instrumentos y los paneles laterales de las puertas, así como las condiciones del tumbado. Es necesario comprobar el funcionamiento del equipo de sonido, el aire acondicionado en el caso de tener, los vidrios y retrovisores eléctricos y en general de todos los componentes eléctricos y electrónicos.

Una vez examinado todo lo anterior nos encontraremos ante tres realidades: a) que se cumpla con la mayoría de los puntos abordados, en cuyo caso el precio a pagar estará hacia el medio del rango referencial; b) que el vehículo exceda el estado normal, esto es que tanto pintura como interior presenten condiciones excelentes, entonces el

precio podría estar hacia el extremo superior del rango referencial; y c) que el vehículo esté por debajo del estado normal dando lugar a que ese precio se sitúe hacia el extremo inferior del rango referencial.

La segunda variable para discriminar un valor es el kilometraje, tantas veces cuestionado por su fácil manipulación, aunque hoy con los odómetros digitales esta mala práctica se ha limitado considerablemente. Como dijimos más arriba, el kilometraje anual de un vehículo liviano oscila entre 20 a 25 000 kilómetros, a lo que podemos agregar que en vehículos de lujo, sedanes especialmente, este no suele rebasar los 15 000. Bien, si un automotor está por debajo del primer rango y su apariencia acompaña este dato, es muy seguro que se trate de un vehículo escasamente recorrido y que su precio se ubique hacia el extremo superior del rango referencial.

En suma, lo máximo que puede llegar a costar un vehículo usado es el precio máximo del rango referencial.

Otra causa que puede incidir en el precio de venta de un vehículo usado es su ubicación geográfica. Los precios que mostramos en la Guía corresponden a los encontrados en Quito que además son una especie de media a nivel nacional; sin embargo, en la costa los vehículos se aprecian entre un 3 a 5% menos, contrariamente a lo que sucede en la sierra central y sur, donde los automotores cuestan 3 a 5% más que en Quito. No estamos hablando de vehículos con placas de Guayas o de cualquier provincia de la costa que se vendan en Quito, ya que esto no es una situación común.

Con estos tips obtenidos de la experiencia de más de 15 años en el mundo de precios de los vehículos usados, creemos poder contribuir a la transparencia de los valores de automóviles, camionetas, todo terreno, furgonetas, camiones y buses, que a continuación encontrarán, recordándoles que según dice la economía: “el precio es el valor pecuniario o monetario que expresa la proporción en que se cambia un bien” en este caso un vehículo, “por dinero”.

¿CÓMO SABER EL AÑO DE SU VEHÍCULO?

Uno de los datos más importantes que necesita conocer el comprador de un vehículo, usualmente usado, es el año del automotor que está adquiriendo. Para poder obtener una información fidedigna debe basarse en el número de identificación del vehículo, más conocido por sus siglas en inglés como V.I.N. (Vehicle Identification Number). Este número impreso en una pequeña placa de metal, está generalmente localizado en el lado izquierdo del salpicadero o panel de instrumentos, visible a través del parabrisas. En algunos modelos el V.I.N. está ubicado sobre el pilar izquierdo del parabrisas.

Desde 1981, el décimo dígito del V.I.N. representa el año del vehículo, para lo cual es preciso revisar la siguiente tabla

Código	Año vehículo	Código	Año vehículo
G	1986	1	2001
H	1987	2	2002
J	1988	3	2003
K	1989	4	2004
L	1990	5	2005
M	1991	6	2006
N	1992	7	2007
P	1993	8	2008
R	1994	9	2009
S	1995	A	2010
T	1996	B	2011
V	1997	C	2012
W	1998	D	2013
X	1999	E	2014
Y	2000	F	2015

(Basada en la Norma NTE INEN - ISO 3779)

ABREVIATURAS USADAS EN LIVIANOS

1.8T	1.8 litros con turbo
4WD FT	Tracción a las 4 ruedas todo el tiempo en Skoda Yeti
4x4	Tracción a las 4 ruedas
6T/M	Caja manual de seis marchas
A/A	Aire acondicionado
AB	Air Bag, equipados con bolsa de aire
ABS	Sistema de freno anti patinaje
AWD	Tracción permanente
b recub	Balde recubierto en Mahindra desde 1/2 de 2012
B/C	Bloqueo central
BD	Bloqueo del diferencial en VW Amarok y Toyota FJ
Bluet	Tecnología Bluetooth
BP	Bajo pedido modelos de Volvo
BR	Fabricado en Brasil
BT	Biturbo en VW Amarok
C/S	Cabina simple
C1/2	Cabina y media para Dodge RAM
Cab ext	Cabina extendida T. Blazer
Cabrio	Cabriolet o convertible
CaR	Cámara de retro
CC	Coupe Cabriolet (convertible)
cil	cilindros
Cin	Cinascar
CM	Cabina Media Serie BT de Mazda

CO o COL	Ensamblado en Colombia
CRD	Tipo de motor turbo diesel
CRDi	Motor diesel con Riel Común
CRTI	Tipo de motor turbo diesel
CSP	Chevy Star Platinum
CSS	Chevy Star Silver
CV	Caballos de vapor
CVT	Transmisión Continuamente Variable
D	Fabricado en Alemania
D/C	Doble cabina
D/H	Dirección hidráulica
DID	Motor turbo diesel de Mitsubishi
DIE	motor a diesel
DLX	Versión de lujo
DOHC	Doble árbol de levas en cabeza
DSC	Control de Estabilidad Dinámico MAZDA3 Skyactive
DT	Dispositivo Satelital
E/E	Espejos eléctricos
EC	Ensamblados en Ecuador
EFI	Sistema de inyección de Toyota
Exc	Modelo Exclusive
F	Fabricado en Francia
GLS	Versión superior a STD
Hal	Halógenos
Hdi	Motor diesel del Peugeot 206
HLA	Arranque en pendiente MAZDA3 Slyactive

HM	Transmisión H Matic
hp	Caballos de fuerza
HPDI	High Pressure Direct Injection en Peugeot 308 diesel
Hriel	Hiper Riel de Nissan X-Trail
HT	Hard Top capota dura en Jeep Wrangler Sport
IM	Suspensión Iron Man en la Mazda BT-50 TSX
JPN	Fabricado en Japón
JTS	Tracción integral permanente Alfa Romeo
K	Compresor en modelos Mercedes
L	Litros
Ltd	Edición Limitada
MEX	Ensamblado en México
Multit	Caja Secuencial Multitronic
N Force	New Force de Kia Sportage
N/B	Nuevo balde en Frontier NP300
neb	Neblineros
Niv1	Nivel 1 de acabado en Citroen
Niv2	Nivel 2 de acabado en Citroen
Nm	Newton-metro, medida de torque
Outd	Outdoors en BT-50 TSX de Mazda
p	Puerta
P.P.	Pintura en parachoques
P/E, PE	Paquete eléctrico
P/U	Pick Up o camioneta de cajón
Pack	Paquete de extras
Paq.	Elementos eléctricos extras en VW

Paq. Elec	Paquete eléctrico
Park	Asistencia de parqueo del Kia Sportage Active
PK	Paquete KIA
PS	Caballos de fuerza
px	Pasajeros
Qu	Quattro de AUDI
RA	Fabricado en Argentina
RM	Radio Media en el New Beetle de VW
S/C	Super Cab o 1 1/4 de cabina
S/F	Semifull
SeR	Sensor de retro
ST	Soft Top capota de lona en Jeep Wrangler Sport
STD	Versión estandar
Stept	Caja secuencial Steptronic
Susp	Suspensión
SUV	Sport Utility Vehicle
SW	Station Wagon
T	Turbo
T/A	Transmisión Automática o Secuencial
T/C	Techo corredizo de cristal
T/M	Transmisión manual
T/P	Techo panorámico
TAI	Tailandia
TCI	motor a diesel
TCS	Control de Tracción MAZDA3 Skyactive
TD	Turbo diesel

TD4	Turbo diesel de 4 cilindros de Land Rover
TD5	Turbo diesel de 5 cilindros de Land Rover
USA	Fabricado en Estados Unidos
v	Velocidades
V/E	Vidrios eléctricos
V-6 o V6	6 cilindros en "V"
V-8 o V8	8 cilindros en "V"
val	Válvulas
VEN	Ensamblado en Venezuela
Vti	Sistema variable de apertura de válvulas
VVTi	Actual sistema de inyección de Toyota
